**Subject:** Request from ADEQ RE: GP Crossett

**Importance:** High

Taimur,

During a conference call with ADEQ on yesterday, Bill Honker and ADEQ managers discussed pursuing modeling that would indicate whether GP Crossett would be able to meet Water Quality Standards for Ouachita River during high tide events (i.e., flooding) at Outfall 001.

Please contact Dr. Bob Blanz of ADEQ to start this planning/scoping as soon as possible.

Stacey
